

Iain Murray Joins Wood Group Pressure Control as Vice-President of Support Services

HOUSTON, April 16, 2008 — Wood Group Pressure Control (“WGPC”), part of international energy services company John Wood Group PLC (“Wood Group”), announced that Iain Murray has joined the company as vice-president of Support Services. In this position, Iain will have worldwide responsibility for project management and quotes, human resources, training, strategy, continuous improvement, and legal.

Most recently, Iain worked with Wood Group’s Gas Turbine Services division as the CEO of Wood Group Generator Services and president of Wood Group Light Industrial Turbines, Americas. Previously, Iain served as general counsel for Wood Group in the Americas and spent seven years working in private practice. Iain has an Honours Bachelor of Laws degree from Edinburgh University in Scotland.

Commenting on the appointment, Scott Bender, president of Wood Group Pressure Control said, “With over 400-percent growth in the last 10 years and a strategic plan for significant further expansion, we are pleased to add someone with Iain’s experience and abilities to the team. Iain brings a fresh approach and a positive attitude to the leadership of many activities vital to our future success.”

Iain said, "Wood Group Pressure Control has a clear vision to become the industry's preferred employer and supplier by 2010, and it's a great pleasure to be part of the team tasked with making this vision a reality."

-end-

Wood Group is an international energy services company with more than US\$4.4 bn sales, employing approximately 25,000 people worldwide and operating in 46 countries. The Group has three businesses - Engineering & Production Facilities, Well Support, and Gas Turbine Services - providing a range of engineering, production support, maintenance management and industrial gas turbine overhaul and repair services to the oil & gas, and power generation industries worldwide.

Wood Group Pressure Control designs and manufactures wellhead systems, gate valves, chokes and actuators that control formation pressures and product flow from initial drilling through production for oil companies around the world. Also offered are repair, maintenance and remanufacturing services for wellhead systems, gate valves and flow control products. Wood Group Pressure Control operations are conducted by more than 1,300 employees from 29 locations in the United States and from 29 other international locations. Manufacturing facilities are located in Oklahoma, Canada, Scotland, Indonesia, Australia, Venezuela, Mexico and China. Web site: www.wgppressurecontrol.com

Wood Group Gas Turbine Services is the world-leading independent provider of integrated maintenance solutions, and repair and overhaul services for industrial gas turbines used for power generation, compression and transmission in the oil & gas and power generation industries.
